

PREMIER PUMP SUPPLY, INC.

PUMP SALES – SERVICE – PARTS

Stocking Distributor & Manufacturers Representative

“EXP” Expert series Air Diaphragm pumps in cast iron, stainless steel, Aluminum, polypropylene and PVDF for fluid transfer, injection and powder Applications. Complete line of Air Accessories and Systems.

Centrifugal Pump Line covering Industrial Processing, Food, Refrigeration, Industrial, Wastewater, Construction, Irrigation and Slurry. Problem solver for high efficiency requirements.

Magnetically coupled gear and centrifugal pumps constructed of 316SS, Alloy 20 and Hastelloy C. Gear pump flows to 55 GPM, pressures to 225 psig. Centrifugal pump flows to 85 GPM, heads to 365 ft.

“Eclipse” Series Non-Metallic Industrial Gear Pumps in ETFE designed for optimal performance and simplicity in operating and maintenance.

End suction, multi-stage, waste water/sewage, variable speed "Aquavar", line shaft turbine type pumps in cast iron & 316 SS. Flows to 5000 GPM with heads to 400'. Factory authorized distributor and warranty service center for Goulds G&L and Commercial Water Technology products.

High-pressure pumps in cast iron, bronze, 316SS, Hastelloy C and plastic construction. Flows to 40 GPM, pressures to 2,500 psig.

Cast iron, bronze, 316SS centrifugal pumps available as close coupled or pedestal mount. Self priming cast iron and 316SS pumps. Vertical, short setting sump pumps.

MTH PUMPS

Regenerative turbine pumps. All iron, bronze fitted and 316SS. Single and multi-stage pumps. Flow rates to 100 GPM, discharge head to 2300 ft.

Mag Drive turbine pumps for OEM temperature control equipment. Temperatures from -73°C to +350°C. Ideally suited for Heat Transfer Fluids such as Galden®, Flourinert™ and other exotic fluids.

Pulsatron Series. Solenoid/Electronic Operated Metering Pumps in SS, GFPP, PVC, PVDF. Peristaltic tube pumps and Turnkey systems for water treatment. OMNI Series Diaphragm Metering pumps in 316SS, PVDF.

Roth regenerative turbine chemical duty pumps provide continuous, high pressure pumping of boiler feed water and corrosive liquids.

Polypropylene PVDF, or ETFE seal-less mag drive pumps with NPT or flanged connections, NEMA C-Face motor mounting, patented dry run bearing system. Mag drive submersibles and self-priming models available. Flows to 300 GPM.

Gorman Rupp family of Gear and Centrifugal Pumps. OTS Pumps includes Engine Driven, Self priming, Magnetic Driven, Sump, Coolant Pumps.
